X Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2017

Section 1 - Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

This Form SD of Clearfield, Inc. (the "Company") is filed for the reporting period from January 1, 2017 to December 31, 2017 pursuant to Rule 13p-1 promulgated under the Securities Exchange Act of 1934, as amended (the "Rule"), and in accordance with the Instructions to Form SD, as modified by the Updated Statement on the Effect of the Court of Appeals Decision on the Conflict Minerals Rule issued by the SEC Division of Corporation Finance on April 7, 2017.

Conflict Minerals Disclosure

Clearfield's Products

In accordance with the Rule, the Company reviewed the products offered and determined that conflict minerals were necessary to the functionality or production of the following products the Company manufactured or contracted to manufacture in the reporting period of January 1, 2017 to December 31, 2017: (1) cable assemblies made with metal compounds that contain the conflict minerals of tin and gold and (2) cabinets and panels comprised of sheet metal containing tin. These cable assemblies, cabinets and panels are referred to as "Covered Products." The Company's fiber connectivity products contain a wide variety of materials that do not contain conflict minerals.

Description of Reasonable Country of Origin Inquiry

In accordance with Rule 13p-1, the Company undertook a reasonable country of origin inquiry ("2017 RCOI") to determine whether the conflict minerals necessary to the functionality or production of the Covered Products were sourced from the Democratic Republic of Congo or an adjoining country (the "Covered Countries") or are from recycled or scrap sources.

The Company's 2017 RCOI was based upon the due diligence framework in the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas ("OECD Due Diligence Guidance") and related Supplements for each of the conflict minerals.

The 2017 RCOI included the following steps:

- The Company first identified all of its active suppliers that may supply products to the Company (components, subassemblies and materials) containing conflict minerals. For this purpose, the Company identified those suppliers that offered products containing conflict minerals for sale generally whether or not the Company actually purchased those products in 2017.
- The Company next conducted a survey of these suppliers using an adapted template developed by the Electronic Industry Citizenship Coalition (the "EICC") and the Global e-Sustainability Initiative (the "GeSI"), known as the Conflict Minerals Reporting Template.

1

- From responsive suppliers, the Company also independently compared the list of smelters/processors collected from suppliers and to the conflict-free smelter lists published by the Conflict-Free Sourcing Initiative.
- For the non-responsive suppliers, the Company reviewed available information, both publicly available and generated in the course of the supply relationship, to determine if there exist warning signs or other circumstances indicating that conflict minerals originated or may have originated in the Covered Countries.

Results of Reasonable Country of Origin Inquiry

The 2017 RCOI results are as follows:

- As to the suppliers that submitted Conflict Minerals Reporting Templates that were complete and responsive: (A) 72 suppliers constituting 79.7% of the dollar volume of all purchases in 2017 indicated that none of the supplies included in the Covered Products contained conflict minerals originating in the Covered Countries; (B) 22 suppliers constituting 9.7% of the dollar volume of all purchases in 2017 indicated that the supplies included in the Covered Products contained conflict minerals originating in the Covered Countries, but that the smelters were certified to be a conflict-free smelter and identified by the template based on listings of certifications by the Conflict-Free Sourcing Initiative; (C) 21 suppliers constituting 8.3% of the dollar volume of all purchases in 2017, the supplier indicated that it was unable to state the country of origin of the conflict minerals in products it supplied to the Company; and (D) none of the supplies included in the Covered Products were from recycled or scrap resources.
 - As to the suppliers that did not submit complete and responsive Conflict Minerals Reporting Templates: The Company did not identify any warning signs or other circumstances indicating that conflict minerals originated or may have originated in the Covered Countries.
